WELCOME TO RYSE

WHAT IS RYSE?

Ryse is a complete audio recording system designed by a hypnotherapist for hypnotherapists.

Working in the industry Master Hypnotherapist Trish Palmer understands the importance of submersive hypnotic sessions. As a therapist we want our clients to achieve a deeper level of trance but also to have a simple and innovative system to record the session.

Who has the time or energy for complicated systems that require computer programs to make them work!?!?

RYSE TECHNOLOGY

The smart technology in the RySe recording system is "Plug and Play" - That means, you plug it in and it plays. It just works!

DYNAMIC AUDIO FOR YOUR VOICE

Ryse is completely customisable for your voice. Make your voice sound dreamy with reverb, younger or deeper with pitch adjustments - add binaural beats and custom music for relaxation and sound like a professional every time!

No stress - No fuss!

FAQ

CAN MY CLIENT ADJUST AUDIO?

YES! your client has full independant volume control and so do you. You can adjust the music, your microphone volume and your client can control their headphone volume as well

I HAVE A NOISY PET AT HOME ...

That's ok - Noise cancelling headphones will solve this and RySe uses a Behringer microphone to capture your voice coming through the system. Reducing any background noises and interruptions by 90%

CAN I CUSTOMISE THE MUSIC AND BEATS?

Yes. You can play any music directly from the device. Simply load your music, press play and go!

You can also Bluetooth your phone/tablet to RySe and play music from your device, Spotify, YouTube music and more.

CAN I USE IT FOR GROUP SESSIONS?

Yes. You can have up to 4 other people listening in on the session with their own volume controls. Because the system is fully portable you could do a group session in the park on a sunny day without interruptions.
